

— 12-MONTH COMMERCIALIZATION PLAN

Three horizons. *One milestone that matters.*

Wedge: fractional CFOs. Shape: solo / lifestyle. The only milestone that matters: **first paying customer in 60 days.**

H1 · 0-90 DAYS

H2 · MONTHS 4-8

H3 · MONTHS 9-12

— WHERE WE ARE TODAY

\$0 MRR. ~5–7 weeks of plumbing to first paid customer.

SHIPPED

- ✓ Phase 1 product works end-to-end (single tenant)
- ✓ Audit log wired (2026-05-17)
- ✓ signkairos.com live, landing page shipped
- ✓ Approval queue persisted across CLI + web

BLOCKERS

- ✗ Multi-tenant scoping – vault is shared globally
- ✗ Auth – memory:8001 + harness:8002 unprotected
- ✗ Hosted deploy – Windows-only run.ps1
- ✗ Billing – Stripe not integrated
- ✗ Native send – drafts work; native send doesn't

— THE THREE HORIZONS

Each horizon's exit is the next horizon's entry.

HORIZON 01 · 0-90 DAYS

\$3-4k

MRR TARGET

6-8 paying logos. Plumbing → wedge feature →
outbound → pilots.

HORIZON 02 · M4-M8

\$10-15k

MRR TARGET

Triggered at \$10k MRR. Native send · M&A
wedge opens · SOC 2 Type 1 prep.

HORIZON 03 · M9-M12

\$30-80k

MRR STEADY STATE

80-200 paying logos. Multi-seat. Concierge →
self-serve.

If a horizon stalls, the next one does not start. Discipline is the strategy.

Plumbing → wedge feature → outbound → pilots.

WKS 1-2

A · Plumbing

Multi-tenant scoping · Clerk auth · Stripe · Fly.io · audit log hash chain

WK 3

B · Wedge feature

Per-Client Board Pack Drafter shippable

WK 4

C · Site & outbound

Loom recorded · 30 cold emails / week to fractional CFOs

WKS 5-8

D · First paid pilots

3 logos at \$1,500 setup + \$399/mo

WKS 9-13

E · Content & scale

Public pricing · LinkedIn cadence · 60 emails / week

HORIZON 01 SHIP-BLOCKERS FOR THE FIRST PAID CUSTOMER

No paid customer until every box is ticked.

- | | |
|--|---|
| <ul style="list-style-type: none">□ <code>tenant_id</code> scoping on every memory + harness route | <ul style="list-style-type: none">□ Memory + harness containerized |
| <ul style="list-style-type: none">□ Clerk-authenticated /app · no anonymous access | <ul style="list-style-type: none">□ Frontend reads base URLs from env (no hardcoded localhost) |
| <ul style="list-style-type: none">□ Stripe Checkout · Solo \$199 · Practice \$399 · Setup \$1,500 | <ul style="list-style-type: none">□ Audit log hash chain – removes the "tamper-evident" overpromise |
| <ul style="list-style-type: none">□ Fly.io deploy with health checks | <ul style="list-style-type: none">□ Vault path scoping verified in tests, not hoped for |

The Board Pack Drafter is the *demo-to-pilot* hook.

WHAT IT DOES

- Pulls from active client's hot.md, recent meeting notes, latest P&L snapshot
- Drafts with cited sources — per-claim wikilink-style references
- Lands in approval queue with full preview + 5-minute countdown
- Renders engagement-end PDF on demand

WHY IT MATTERS

Buyer's #1 fear is the cross-client send disaster. This is the feature that converts the demo to a pilot.

Without this feature, Kairos is "another note app with AI."
With it, Kairos is "the thing that drafts my March board pack without crossing wires."

HORIZON 02 MONTHS 4 → 8 · TRIGGERED AT \$10K MRR

\$10k MRR opens the M&A wedge.

WORKSTREAM

Native Gmail send

Reply / draft / send through approval queue. Removes the "drafts only" caveat.

WORKSTREAM

Native Calendar

Book follow-ups · since-last-meeting context

WORKSTREAM

Mobile approvals

Web push or Telegram – approve from anywhere

WORKSTREAM

SOC 2 Type 1 prep

Vendor onboarding · policy library · ~3-6 months wall-clock

WORKSTREAM

First M&A pilots

Founder-led outbound · 60-90 day broker-dealer review per logo

HORIZON 03 MONTHS 9 → 12 · STEADY STATE

\$30–80k MRR. *\$600k–\$1M ARR.*

PRODUCT

- Multi-seat Practice tier — real RBAC (admin / member)
- Concierge → self-serve handoff — convert the \$1,500 setup into in-product steps
- Engagement-end PDF report — the artifact that makes the audit log pay for itself

DISTRIBUTION

- LinkedIn cadence sustained at 60 emails / week
- Content marketing — playbooks for the fractional-CFO buyer
- 1–2 paid newsletter sponsorships in the CFO Connect orbit
- Outbound stays founder-led through year one

— EXPLICITLY NOT ON THIS ROADMAP

Each item dilutes the wedge. *Each is a hard pass.*

X D2C personal AI / consumer chief-of-staff

X Open-source-with-paid-hosting

X OEM / white-label

X Single-family offices · revisit only after 2 finance reference logos

X Healthcare verticals · HIPAA tax not worth it solo

X Anything that requires a second engineer through year one

What can derail this — and what flips it.

RISK

LLM training-data terms change

FLIP →

Lock current Gemini paid-tier version in DPA · prep Anthropic + OpenAI fallback prompts.

RISK

Cross-client leak ships before scoping

FLIP →

Plumbing blocks every other phase. No paid customer until done.

RISK

Solo burnout at 30 hrs / week

FLIP →

At \$30k MRR, hire one part-time contractor (frontend or growth, not both).

RISK

Landing copy held against us

FLIP →

Fix code (hash chain, tenant scoping) before the 4th cold email cycle.

— HOW THIS STAYS ALIVE

Friday review.

Each Friday — tick boxes for the active phase. If a box stays unticked two weeks running, write a sentence on why and decide: *cut scope* · *push milestone* · *escalate*.

When a horizon flips, the prior outcome rolls into `business/state.md`.
